

NO COMPONENT
IS TOO ODD
JOT ODD SHAPE
ASSEMBLY CELL

JOT
automation

KEY FEATURES

- Well-equipped to handle all components regardless the shape
- +100 different component types already assembled
- The most cost efficient solution
- Best-in-class on accuracy and reliability in demanding production conditions
- Product lifetime +25 years
- Close to 80% reusability of platform and feeders
- Minimized footprint 1.4 m² and yet feeding parallel up to 5 different components
- Easily expandable to automate +20 different processes

STANDARD FEATURES

- Active and passive clinching
- High precision mechanical tools
- Gripper presence detection
- Component presence sensing
- Insertion tests
- Easily configurable to versatile applications
- Applicable with different types of component feeders and grippers
- Automatic tool exchange system
- Easy set up with graphical user interface

OPTIONS

- Transport direction from right to left
- Automatic conveyor width adjustment
- Conveyor speed adjustment
- Pallet conveyor
- Bar code or 2D reader

APPLICATIONS

- Component placement
- Screw insertion
- Soldering
- Laser marking
- Labeling
- Packaging

We have all the know-how to build the best test and assembly solutions, just name your need. Find numerous application and platform examples online, or send us an inquiry to info@jotautomation.com.
